PROFESSIONAL PROFILE

Computer Science graduate (ADP CS) with practical experience in a professional software-house environment and formal training in web development. Strong working knowledge of Microsoft Office, computer operations, documentation, data handling, internet and email workflows, and day-to-day digital office tasks. Also experienced in WordPress, Divi and frontend web development, providing an additional technical foundation. Seeking an entry-level IT, computer operations, office technology, data management or technical support role.

CORE COMPUTER & IT SKILLS

Microsoft Word	Document creation, formatting, tables, page layout and printing
Microsoft Excel	Data entry, spreadsheets, formatting, sorting/filtering and basic formulas
Microsoft PowerPoint	Presentation creation, layouts, formatting and visual organization
Windows & File Management	File/folder organization, system settings and everyday computer operations
Data & Documentation	Data entry, digital records, document handling and organized information management
Internet & Email	Web research, browsing, email handling, attachments and online communication
PDF & Digital Files	PDF handling, conversion, merging and basic document workflows
Office Equipment	Basic use of printers, scanners and common computer peripherals
Software & IT Support	Software installation/configuration and basic computer troubleshooting
Google Workspace	Google Docs, Sheets, Drive and online forms
Basic Networking	General understanding of connectivity and common network troubleshooting

PROFESSIONAL EXPERIENCE

Web Development Intern — Software House

5 Months

- Worked in a professional software-house environment on assigned web development and website-related tasks.
- Developed and customized websites using WordPress and Divi, with practical use of HTML, CSS and basic JavaScript.
- Performed website updates, content management, UI improvements, responsive layout work and troubleshooting.
- Used local development environments and managed website assets, files and project resources.
- Followed task-based workflows, deadlines and professional team practices.
- Built practical understanding of software tools, digital workflows and problem-solving in a professional environment.

PROFESSIONAL TRAINING

NAVTTC — Web Development Course

3 Months

Formal practical training in web development fundamentals, website structure, frontend technologies and web-related tools.

EDUCATION

Associate Degree in Computer Science (ADP CS)

Academic background covering computer science, programming, information technology and related computing concepts.
